Top Tips for Visualizing

Visualizing is when the words in the book help create a mental image in your mind.

Remember...

- A visual image is not a picture you see with your eyes. It's a thinking picture you see in your brain!
- You need to Train your Brain to visualize! Practice visualizing with your eyes opened and with your eyes closed, and see which one works better for you.
- You have hundreds of millions of neurons in your brain! Use your Brain Power to create your visual images.
- Visualizing isn't just about what you see. Try using all your senses when you visualize: sight, sound, taste, smell, touch.
